

Computer Systems Live Classroom Application

This 24 hour (3 day) live classroom learning (in-person or remote learning) is appropriate for 3 to 24 learners. It will cover each chapter of the Computer Systems book and Laboratory in order, with QA after each section. It is recommended that a soft cover book/lab and Raspberry Pi pair (RPi 2, 3 or 4) be available to at least each group of 2 to 5 students for hands on learning.

The base cost is \$1500 for in-person 3 day instruction from the author. This assumes a hosted site and travel within 60 miles from zip code 95060. Equipment/book and procurement costs also not included. Please complete this form to schedule a live classroom learning experience for your team or students. Age 12+ or appropriate math/social level. We do not guarantee complete coverage of the material in the time provided, and frequent interruptions are typically the cause of this. English language instruction only – translator(s), if required, are the responsibility of the host audience. Preparations will be made for advanced or emerging learners, please share the experience level of the participants in the form below.

Please include multiple dates in your application (if possible) to facilitate approval. Upon approval of a date/time/place/group, a final line item invoice will be emailed and a 25% deposit (non-refundable) required to secure the date and travel arrangements. Refunds of remaining balance require a one week notice, however rescheduling is possible but additional travel expenses may be required (depending on ability to cancel prior arrangements). For equipment (softcover and Raspberry Pi's/connectors), it is acceptable to choose to have your own, or rent or purchase directly from us. Your choice will be reflected in the final invoice – if you choose to have your own please provide details of what is available and know that setup and verification will be required before the event.

Any disputes will be handled through arbitration. Signing and agreeing to this application waives all rights of the signatory or their agents and customers to seek dispute resolution of this contract in civil court. For questions email me at lawless.sean@yahoo.com.
